

	COMPANY POLICY FOR QUALITY, ENVIRONMENT AND SAFETY		Code:	M-DIR-05
	Rev.	5	Date	31/01/2025
	Pag.	1	Of	2

Our company is committed to providing high-quality products and services while reducing our environmental impact and ensuring the safety and well-being of our employees. We are committed to continuously improving our business practices through compliance with ISO 9001, ISO 14001, and ISO 45001, with a focus on preventing injuries, conserving natural resources, reducing emissions, and improving operational efficiency. Sustainability is at the heart of our vision, and we work to build a safer, healthier, and more environmentally friendly future.

A sustainability, quality, environmental, health and safety policy integrated with ISO 9001, ISO 14001 and ISO 45001 standards represents a corporate commitment to respect and promote excellent practices in these sectors.

Let's see how each of these areas can be applied within company policies integrated with ISO management systems:

1. Quality Policy (ISO 9001)

- **Commitment to quality:** The quality policy is committed to constantly improving business processes to ensure that products and services meet customer expectations and comply with applicable standards.
- **Objectives:**
 - Meeting customer needs through high-quality products and services.
 - Optimize business processes to reduce waste and inefficiencies.
 - Maintain continuous improvement and data-driven management.
- **Sustainability applied to quality:**
 - Adoption of production practices that reduce the use of resources, reduce waste and improve efficiency.
 - Integration of sustainability into supplier selection criteria and procurement strategies.

2. Environmental Policy (ISO 14001)

- **Commitment to the environment:** The environmental policy is aimed at reducing the environmental impact of the organization through the effective management of natural resources and the prevention of pollution.
- **Objectives:**
 - Minimize energy consumption, reduce polluting emissions and the volume of waste produced.
 - Adopt ecological technologies and practices for a sustainable use of resources.
 - Comply with local and international environmental regulations.
- **Sustainability applied to the environment:**
 - Promotion of production with low environmental impact.
 - Introduction of strategies for recycling, reuse and sustainable waste management.
 - Adoption of renewable energy sources and optimization of the use of natural resources.

○

3. Health and Safety Policy (ISO 45001)

- **Commitment to safety and health:** The health and safety policy focuses on creating a safe working environment, preventing accidents and occupational diseases.
- **Objectives:**
 - Ensuring the safety of workers, reducing risks and improving safety in the workplace.
 - Promote the physical and mental well-being of employees.
 - Comply with occupational health and safety regulations.
- **Sustainability applied to health and safety:**
 - Implementation of strategies to improve working conditions and reduce risks in a preventive manner.
 - Continuous education and training of employees on safety and health.
 - Adoption of technologies and processes that reduce risks in the workplace.

Conclusion

An integrated approach to corporate policies that considers **quality, environment, health and safety** through ISO 9001, ISO 14001 and ISO 45001 standards not only helps to comply with international standards, but also allows you to pursue a business model that respects the values of sustainability, social responsibility and safety.
